SPECIALIZED DISCLOSURE REPORT

Entegris, Inc.

(Exact name of the registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

001-32598
(Commission
File Number)

41-1941551
(IRS Employer
Identification No).

129 Concord Road
Billerica, Massachusetts
(Address of principal executive offices)

01821
(Zip Code)

Sue Lee
Senior Vice President, General Counsel and Secretary
(978) 436-6500
(Name and telephone number, including area code, of the
person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

- x Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1, 2016 to December 31, 2016.

Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

This Form SD of Entegris, Inc. (the “Company”) is filed pursuant to Rule 13p-1 promulgated under the Securities Exchange Act of 1934, as amended, for the reporting period January 1, 2016 to December 31, 2016.

A copy of Conflict Minerals Report is provided as Exhibit 1.01 and is publicly available at

<https://www.entegris.com/content/dam/web/about-us/corporate-overview/documents/report-conflict-minerals.pdf>

Item 1.02 Exhibit

As specified in Section 2, Item 2.01 of this Form SD, the Company is hereby filing its Conflict Minerals Report as Exhibit 1.01 of this report.

Section 2 - Exhibits

Item 2.01 Exhibits

The following exhibit is filed as part of this report.

Exhibit No.	Description
1.01	Entegris, Inc. Conflict Minerals Report for the reporting period from January 1, 2016 to December 31, 2016

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

ENTEGRIS, INC.

By: /s/ Gregory B. Graves

Name: Gregory B. Graves

Title: Executive Vice President and Chief Financial Officer

May 31, 2017

(Date)

EXHIBIT INDEX

Exhibit No.	Description
1.01	Entegris, Inc. Conflict Minerals Report for the reporting period from January 1, 2016 to December 31, 2016

Entegris, Inc.**Conflict Minerals Report****For the reporting period from January 1, 2016 to December 31, 2016****1 Introduction**

This Conflict Minerals Report (this “Report”) of Entegris, Inc. (herein referred to as the “Company”, “we”, “us”, or “our”) has been prepared pursuant to Rule 13p-1 and Form SD (the “Rule”) promulgated under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), for the reporting period from January 1, 2016 to December 31, 2016.

The Rule was adopted by the Securities and Exchange Commission (the “SEC”) to implement reporting and disclosure requirements related to conflict minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010.

The Rule requires disclosure of certain information when a company manufactures or contracts to manufacture products and the minerals specified in the Rule are necessary to the functionality or production of those products. “Conflict Minerals” are defined as cassiterite, columbite-tantalite (coltan), wolframite, gold and their derivatives, which are limited to tin, tantalum, tungsten, and gold (“3TG”). These requirements apply to registrants whatever the geographic origin of the Conflict Minerals and whether or not they fund armed conflict. The “Covered Countries” for the purposes of the Rule and this Report are the Democratic Republic of the Congo, the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia and Angola.

If any Conflict Minerals are necessary to the functionality or production of a product manufactured by the registrant or contracted by the registrant to be manufactured and are required to be reported in the calendar year covered by the Specialized Disclosure Report on Form SD (the “Form SD”), the registrant must conduct in good faith a reasonable country of origin inquiry (“RCOI”) regarding those Conflict Minerals that is reasonably designed to determine whether any of the Conflict Minerals originated in the Covered Countries or are from recycled or scrap sources.

Based on its RCOI, if the registrant knows that any of its necessary Conflict Minerals originated in the Covered Countries and are not from recycled or scrap sources, or has reason to believe that its necessary Conflict Minerals may have originated in the Covered Countries and has reason to believe that they may not be from recycled or scrap sources, the registrant must exercise due diligence on the source and chain of custody of its Conflict Mineral that conforms to a nationally or internationally recognized due diligence framework. If, as a result of that due diligence, the registrant is unable to determine that its Conflict Minerals did not originate in the Covered Countries or the registrant determines that its conflict minerals did come from recycled or scrap sources, the registrant must annually file a Report as an exhibit to its Form SD that includes a description of its due diligence measures on the source and chain of custody of those Conflict Minerals.

This Report has not been audited.

Certain information contained in this Report may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are based on current management expectations only as of the date of the Form SD to which this Report is an Exhibit, and involve substantial risks and uncertainties that could cause actual results to differ materially from the results expressed in, or implied by, these forward-looking statements. Statements that include such words as “anticipate,” “believe,” “estimate,” “expect,” “forecast,” “may,” “will,” “should” or the negative thereof and similar expressions as they relate to the Company or our management are intended

to identify such forward-looking statements. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. These risks include but are not limited to, our ability to successfully implement the steps indicated in the “Additional Risk Mitigation Steps” section of this Report, our ability to implement such steps in the anticipated timeframe, and other factors. Except as required under the federal securities laws and the rules and regulations of the SEC, we undertake no obligation to update publicly any forward-looking statements contained herein.

1.1 Company Overview

The Company is a leading global developer, manufacturer and supplier of microcontamination control products, specialty chemicals and advanced materials handling solutions for manufacturing processes in the semiconductor and other high-technology industries. Entegris seeks to leverage its unique breadth of capabilities to create value for its customers by developing mission-critical solutions to maximize manufacturing yields and enable higher device performance.

Our technology portfolio includes approximately 20,000 standard and customized products and solutions to achieve the highest levels of purity and performance that are essential to the manufacture of semiconductors, flat panel displays, light emitting diodes or LEDs, high-purity chemicals, solar cells, gas lasers, optical and magnetic storage devices, and critical components for aerospace, glass manufacturing and biomedical applications. The majority of our products are consumed at various times throughout the manufacturing process, with demand driven in part by the level of semiconductor and other manufacturing activity. The Company’s customers consist primarily of semiconductor manufacturers, semiconductor equipment and materials suppliers as well as thin film transistor-liquid crystal display (TFT-LCD) and hard disk manufacturers, which are served through direct sales efforts, as well as sales and distribution relationships, in the United States, Asia, Europe and the Middle East.

Our business is organized and operated in three operating segments which align with the key elements of the advanced semiconductor manufacturing ecosystem.

Specialty Chemicals and Engineered Materials provides high-performance and high-purity process chemistries, gases, and materials, and safe and efficient delivery systems to support semiconductor and other advanced manufacturing processes.

Microcontamination Control offers solutions to purify critical liquid chemistries and gases used in semiconductor manufacturing processes and other high-technology industries.

Advanced Materials Handling develops solutions to monitor, protect, transport, and deliver critical liquid chemistries and substrates for a broad set of applications in the semiconductor industry and other high-technology industries.

While these segments have separate products and technical know-how, they each share a single, global sales force, unified core systems and processes, global technology centers, strategic and technology roadmaps, and a focus on a common set of customers. The Company leverages its expertise and technologies from these three segments to create new and increasingly integrated solutions for its customers.

3TG’s are used in the Company’s business units which utilize the following components: sensors, monitors, valves, control modules, displays, pressure transducers, flow controllers, printed circuit boards, printed wire board, and cables. Tin (primarily in tin-based solder) and gold (in electronic components) are the predominant materials in use, while tantalum is reported on a minimal level, and tungsten is mainly found in tungsten impregnated graphite.

In February 2014, the Company adopted a policy relating to Conflict Minerals (the “Conflict Minerals Policy”) incorporating the standards set forth in the then-current version of the Organization for Economic Cooperation and Development (“OECD”) Due Diligence Guidance for Responsible Supply

Chains of Materials from Conflict-Affected and High Risk Areas and the related Supplements for 3TG, second edition (the “OECD Guidance”). Our Conflict Minerals Policy can be found on our website at <https://www.entegris.com/content/dam/web/about-us/corporate-overview/documents/policies/policy-conflict-minerals.pdf>

1.2 Supply Chain

As a developer, manufacturer and supplier of products and materials to semiconductor and other high-technology industries, the Company is several levels removed from the mining and refining of 3TG’s.

The Company does not make purchases of raw ore or unrefined 3TG’s and makes no direct purchases in the Covered Countries. As a result, we rely on our suppliers to provide information on the origin of 3TG’s that may be contained in components and materials supplied to us.

In the course of negotiating new supply agreements or renewals of existing supply agreements, members of our procurement organization provide the requirements of the Rule and Conflict Minerals disclosure process to suppliers to increase awareness and educate our suppliers on the Rule’s requirement for cooperation and reporting from sub-suppliers.

We are committed to compliance with the Rule and working toward avoiding the use of 3TG’s that directly or indirectly finance or benefit armed groups in the Covered Countries. If we become aware of a supplier whose supply chain includes minerals that are not conflict free, we will take appropriate steps to address the situation in a timely manner, including reassessment of the supplier relationship. We expect our suppliers to take similar measures with their sub-suppliers.

2 Reasonable Country of Origin Inquiry Program

The Company conducted a RCOI regarding the 3TG’s in materials, components and finished goods supplied to the Company, including the steps detailed below.

The conflict minerals team risk-stratified the Company’s list of suppliers that supply products potentially containing 3TG’s to identify the suppliers that constitute the top 80% of total spend with suppliers of in-scope products and focused direct Company engagement efforts toward suppliers within this group. The Company identified 1,185 suppliers that supply products potentially containing 3TG’s and engaged with such suppliers to collect information regarding the presence and sourcing of 3TG in its products.

The Company, with the assistance of our third-party compliance partner Assent Compliance Inc. (“Assent”), contacted all our suppliers with an automated email describing the compliance requirements and requesting supply chain information be submitted pursuant to version 4.1 or higher of the Conflict Free Sourcing Initiative’s Conflict Minerals Reporting Template (“CMRT”). Additionally, if a response was not received from the initial contact, follow-up emails were sent to suppliers offering assistance and further information about the requirements of the Rule and its requirements. If, after these outreach efforts, a supplier still did not respond to the survey, the Company’s relevant supplier relationship managers were instructed to contact those suppliers directly for a response. As of May 26, 2017, the Company had an overall response rate from surveyed suppliers of 53%.

The Company utilized a software platform which validated the information submitted on CMRTs. The goal of data validation is to increase the accuracy of submissions and identify any contradictory answers in the CMRT. All submitted forms are accepted and classified as valid or invalid so that, in either event, data is retained. Suppliers were contacted in regards to invalid forms and were encouraged to resubmit a valid form. As of May 26, 2017, we still had 18 invalid supplier submissions that were not yet corrected.

In certain instances, suppliers responded indicating that they provide products containing 3TG’s to the Company, but did not include the name of any verified smelters or refiners.

Based on the responses received from the Company's RCOI, a list was compiled of 317 verified unique smelters and refiners (the "unique smelter list"), including information regarding associated countries of origin.

2.1 Reasonable Country of Origin Inquiry Results

On the basis of the responses to our RCOI, the Company is unable to determine that 3TG's necessary to the functionality or production of our products did not originate in the Covered Countries or were not exclusively from recycled or scrap sources. Accordingly, the Company undertook the measures described below to assess the due diligence practices of the smelters and refiners listed on its unique smelter list that were known or reasonably believed to have sourced from the DRC or that had unknown sourcing.

3 Due Diligence

3.1 Design of Due Diligence

We established a Conflict Minerals compliance program that is designed to conform, in all material respects, to the framework in the OECD Guidance.

3.1.1 Establish Strong Company Management System Internal Team

Internal Team

The Company has established a management system with respect to the Rule and the obligations thereof. Our management system includes a cross-functional team, the conflict minerals team, which is sponsored by the Chief Financial Officer. Members of the conflict minerals team include representatives from Environmental, Health and Safety ("EHS"), Procurement, Product Stewardship, Finance, Law and Internal Audit departments. The conflict minerals team is responsible for implementing our conflict minerals compliance strategy and is led by the Global Director of EHS who acts as the conflict minerals coordinator. Senior management is briefed about the results of the conflict minerals team's progress and due diligence efforts on a regular basis.

Conflict Mineral Policy

As described above, in February 2014, the Company adopted the Conflict Minerals Policy incorporating the standards set forth in the then-current version of the OECD Guidance. Our Conflict Minerals Policy can be found on our website at <https://www.entegris.com/content/dam/web/about-us/corporate-overview/documents/policies/policy-conflict-minerals.pdf>

Control Systems

While a portion of our direct suppliers are also Exchange Act registered companies which are subject to and knowledgeable about the Rule, we also have many other suppliers and distributors that are not registered companies that require additional training to understand the requirements of the Rule.

We do not typically have direct relationships with 3TG smelters and refiners. However, through associations like National Association of Environmental Managers ("NAEM"), Semiconductor Equipment and Materials International ("SEMI") and Electronic Industry Citizenship Coalition ("EICC"), we attempt to mitigate the risk of using Conflict Minerals that benefit armed groups in our supply chain by actively monitoring best practices used by other manufacturers in the semiconductor and high technology sectors and participating in a number of industry-wide initiatives. Additionally, in 2016, the Company engaged Assent to further implement Conflict Mineral surveys, outreach, and tracking best practices.

Internal controls include our on-going initiative of integrating Conflict Minerals related provisions in our supply agreements that require disclosure of 3TG's and Conflict Minerals.

Supplier Engagement

In accordance with the OECD requirement to strengthen engagement with suppliers, we have made reasonable inquiries to direct suppliers to obtain 3TG data, provided them with requirements of our Conflict Minerals Policy and informed them as to where they may find additional information on the requirements relating to conflict minerals disclosure.

The Company has provided education and training relating to the Rule and to Conflict Minerals to all in-scope suppliers by providing such suppliers with access to Assent's Learning Management System training course. This training is tracked and evaluated based on completion. All suppliers are encouraged to complete all modules within this course.

Additionally, as identified earlier, our procurement organization continues to integrate Conflict Minerals related requirements language into new supply agreements or renewals of existing supply agreements during the course of negotiations. Accordingly, we are continuing our attempts to identify risks before entering into such agreements, so that steps can be taken to confirm suppliers have implemented processes to identify the origin of 3TG's.

Maintain Records

As part of our EHS Management System, we have developed a record retention requirement for information relating to the management of our Conflict Minerals compliance process. All relevant records will be retained for a period of 5 years.

Grievance Mechanism

Our Code of Business Ethics, which is available on our website at <http://investor.entegris.com/governance.cfm>, provides details about our grievance mechanisms, such as the details of our dedicated mailbox and hotline, whereby violations of our policies, including our Conflict Minerals Policy, may be reported.

In addition, the Company has established a monitored email account, with the address of supplier.whistleblowing@Entegris.com, and has notified its suppliers of such email address, so that suppliers may provide information regarding Conflict Minerals compliance issues.

3.1.2 Identify and Assess Risk in the Supply Chain

Because of our size, the complexity of our products, and the depth, breadth, and constant evolution of our supply chain, it is difficult for us to identify actors upstream from our direct suppliers. We have determined that seeking information about 3TG smelters and refiners in our supply chain represents the most reasonable effort we can make to determine the mines or locations of origin of the 3TG's in our supply chain. This was done by adopting methodology outlined by the CFSI's joint industry programs and outreach initiatives and requiring our suppliers to conform with the same standards to meet the OECD Guidelines, and report to us using the CMRT. Through this industry joint effort, we made a reasonable determination of the mines or locations of origin of the 3TG's in our supply chain. We also requested that all of our suppliers support the initiative by following the sourcing initiative and working to align their declared sources with the lists of sourced metals certified by third party sources as "Known" and "Conflict Free".

We have identified 1,185 direct suppliers. We rely on suppliers whose materials or components contain 3TG's to provide us with information about the source of 3TG's contained in those materials or components. Our direct suppliers similarly rely upon information provided by their suppliers. Many of the largest suppliers either are Exchange Act registrants and subject to the Rule or are suppliers to other Exchange Act registrants that are subject to the Rule.

In accordance with OECD Guidelines, it is important to understand risk levels associated with Conflict Minerals in the supply chain. Smelters that are not certified by third party sources, such as the Conflict-Free Sourcing Initiative (“CFSI”) or the London Bullion Market Association (“LBMA”) Responsible Gold Program as DRC-Conflict Free, pose a significant Conflict Minerals risk. Each facility that meets the CFSI definition of a smelter or refiner of a 3TG mineral is assigned a risk of high, medium or low based on 3 scoring criteria:

- Geographic proximity to the DRC and covered countries;
- Conflict-Free Smelter Program (CFSP) audit status; and
- Known or plausible evidence of unethical or conflict sourcing.

Suppliers are also evaluated on their Conflict Minerals program strength (further assisting in identifying risk in the supply chain). Evaluating and tracking the strength of such Conflict Minerals program can assist in making key risk mitigation decisions as the program progresses. The criteria used to evaluate the strength of the supplier’s Conflict Minerals program are:

- Does the supplier have a Conflict Minerals policy in place that prohibits the procurement of 3TG’s from sources that directly or indirectly finance or benefit armed groups in the Covered Countries?
- Has the supplier implemented due diligence measures to implement such policy?
- Does the supplier verify due diligence information received from its suppliers?
- Does the supplier’s verification process include corrective action management?

Based on a supplier’s answer to the above criteria, the supplier’s Conflict Minerals program will be ranked as either strong or weak.

3.1.3 Design and Implement a Strategy to Respond to Risks

As per the OECD Due Diligence Guidance, risk mitigation will depend on the supplier’s specific role in the supply chain. When a high-risk smelting facility is reported on a CMRT by a supplier surveyed, risk mitigation will include:

- Requesting the supplier to submit product specific CMRT to better identify the connection to products that they supply to Entegris;
- Guiding suppliers to the Assent University learning platform to access educational materials on mitigating the risk of smelters or refiners on the supply chain; and
- If necessary, requesting all of our suppliers whom we have reason to believe are supplying us with 3TG’s from sources that may directly or indirectly finance or benefit armed groups in the Covered Countries to establish an alternative source of 3TG’s that does not support such conflict, as provided in the OECD guidance. To date, we have found no instances where it was necessary to terminate a contract or find a replacement material or supplier for issues relating to Conflict Minerals.

3.1.4 Third-Party Audit of Supply Chain Due Diligence

As a downstream purchaser of Conflict Minerals, our due diligence process is based on the necessity of relying on data obtained from our direct suppliers. We also rely on information collected and provided by other external audit programs. As such, we have not conducted third-party audits of any smelters or refiners.

3.1.5 Report on Supply Chain Due Diligence

This Conflict Minerals Report is on file with the SEC and is publicly available on our web site at <https://www.entegris.com/content/dam/web/about-us/corporate-overview/documents/report-conflict-minerals.pdf>

3.2 Due Diligence Results

The large majority of the responses we received from the supplier survey provided data at a company or divisional level or were unable to specify the smelters or refiners used for components supplied to us. We are therefore unable to determine whether the 3TG's reported by the suppliers were contained in components or parts supplied to us. Furthermore, suppliers did not always provide smelter lists nor were the smelter lists consistently completed with smelter identification numbers, and therefore we were unable to validate that any of these smelters or refiners are actually in our supply chain.

The current efforts focus on gathering smelter information via the CMRT and, as the program progresses, requiring full completion of all necessary smelter identification information which will enable the validation and disclosure of the smelters as well as the tracing of 3TG's to their location of origin. Seeking information about 3TG smelters and refiners in our supply chain represents the most reasonable effort we can make to determine the mines or locations of origin of 3TG's in our supply chain.

Certain of the responses provided by suppliers to the CMRT did include the names of facilities listed by the suppliers as smelters or refiners. We do not typically have a direct relationship with 3TG smelters and refiners and do not perform or direct audits of these entities within our supply chain. Assent Compliance, our third-party compliance partner, compared these facilities listed in the responses to the list of smelters maintained by the CFSI and the LBMA and, if a supplier indicated that the facility was certified as "Conflict-Free", Assent Compliance confirmed that the facility was, in fact, listed as such by CFSI.

As of May 26, 2017, we have validated 317 smelters or refiners and are working to validate the additional smelter and refiner entries from the submitted CMRTs. The table set forth on Schedule 1 to this CMR lists the valid smelters identified by suppliers we surveyed. Not all of these facilities have necessarily processed 3TG's contained in our products covered by this Conflict Minerals Report. This is because our suppliers generally provided information via the CMRT at the company or divisional level, and generally did not limit their CMRT responses to information relating to 3TG's in specific products supplied to us.

Based on the information provided by our suppliers in their CMRT's, we are aware that there are 246 smelters that are certified "Conflict-Free", and 13 smelters are active in the CFSP third-party audit process. Many suppliers are still unable to provide the smelters or refiners used for materials supplied to us. Furthermore, many of the responses provided at the company or division level indicated an "unknown" status in terms of determining the origin of 3TG's.

Based on our due diligence, the products that we manufacture or contract to manufacture which contain 3TG's are classified as "DRC conflict undeterminable" in 2016 as information on sources remains incomplete at this time.

4 Additional Risk Mitigation Steps

In keeping with our commitment to continual improvement, our Product Stewardship Team performed a review of our internal program in the first quarter of 2017. Observations and recommendations have been summarized and integrated the Conflict Minerals Action Plan for 2017.

The Company intends to take the following steps to improve the RCOI and due diligence conducted to further identify and mitigate the risk that our products contain Conflict Minerals from sources that support conflict in the Covered Countries:

- a) Further collaboration with our third-party compliance partner, Assent, to raise supplier survey response rates, as well as implement best practice supplier education and engagement initiatives.
- b) Increase the response rate from our suppliers by 25% to 75%.
- c) Include Conflict Minerals flow-down clauses in new or renewed supplier contracts.
- d) Engage, as needed, with suppliers and direct them to training resources to increase knowledge, increase response rates, and improve the reliability of responses.
- e) Continue to work with the company supply chain managers to increase their understanding of the program and the need for continuous improvement.
- f) If applicable, upon learning of a supplier found to be supplying 3TG's from sources that support conflict in the Covered Countries, establish an alternative source that does not support such conflict.
- g) Continue to monitor the OECD and relevant trade associations to incorporate best practices to improve our processes and leverage our supply chain in accordance with OECD Guidance.
- h) Investigate and act on recommendations from our internal review process.
